

42390P11166

PATENT

**CLAIM AMENDMENTS:**

1. (Currently amended) A method for location-based image sharing, comprising:
  - defining a sharing rule that specifies with which one or more recipients images are shared based on location-identifying information associated with the one or more recipients images; and
  - applying location-identifying information associated with an image to the sharing rule to determine the one or more recipients with which the image should be shared.
2. (Previously amended) The method of claim 1, further comprising:
  - making the image automatically available to the determined one or more recipients.
3. (Original) The method of claim 2, wherein making the image available comprises either automatically sending a copy of the image to the determined one or more recipients by e-mail or automatically sending a link to the image on a Web site to the determined one or more recipients.
4. (Original) The method of claim 1, further comprising converting the location-identifying information into location data using a location database.
5. (Previously amended) The method of claim 1 wherein the location identifying information comprises latitude and longitude coordinates.
6. (Previously amended) The method of claim 1 wherein the image is at least one of a digital photo and a digital video.
7. (Previously amended) The method of claim 1 wherein the sharing rule specifies at least one of a proximity to the location-identifying information, a set of location-identifying information and a bounding perimeter of location-identifying information.
8. (Original) The method of claim 1 wherein the sharing rule comprises a rule that images are only to be shared with the one or more recipients that are on a buddy list.

42390P11166

PATENT

9. (Currently amended) A system for location-based image sharing, comprising:  
a sharing rule defining with which one or more recipients images are shared based on  
location-identifying information associated with the one or more recipients images; and  
a sharing engine to apply location-identifying information associated with an image to the  
sharing rule to determine the one or more recipients with which the image should be  
shared.

10. (Previously amended) The system of claim 9, further comprising:  
a sending unit to make the image automatically available to the determined one or more  
recipients.

11. (Original) The system of claim 10, wherein the sending unit is adapted to either  
automatically send a copy of the image to the determined one or more recipients by e-  
mail or automatically send a link to the image on a Web site to the determined one or  
more recipients.

12. (Original) The system of claim 9, wherein the sharing engine is further adapted to  
convert the location-identifying information into location data using a location database.

13. (Previously amended) The system of claim 9 wherein the location-identifying  
information comprises latitude and longitude coordinates.

14. (Previously amended) The system of claim 9 wherein the image is at least one of a  
digital photo and a digital video.

15. (Previously amended) The system of claim 9 wherein the sharing rule specifies at  
least one of a proximity to the location-identifying information, a set of location-  
identifying information and a bounding perimeter of location-identifying information.

42390P11166

PATENT

16. (Original) The system of claim 9 wherein the sharing rule comprises a rule that images are only to be shared with the one or more recipients that are on a buddy list.
17. (Currently amended) A computer program product including computer program code to cause a processor to perform a method for location-based image sharing, the method comprising:
  - defining a sharing rule that specifies with which one or more recipients images are shared based on location-identifying information associated with the one or more recipients images;
  - and applying location-identifying information associated with an image to the sharing rule to determine the one or more recipients with which the image should be shared.
18. (Previously amended) The computer program product of claim 17, wherein the method further comprises making the image automatically available to the determined one or more recipients.
19. (Original) The computer program product of claim 18, wherein making the image available comprises either automatically sending a copy of the image to the determined one or more recipients by e-mail or automatically sending a link to the image on a Web site to the determined one or more recipients.
20. (Original) The computer program product of claim 17, wherein the method further comprises converting the location-identifying information into location data using a location database.
21. (Previously amended) The computer program product of claim 17 wherein the location-identifying information comprises latitude and longitude coordinates.
22. (Previously amended) The computer program product of claim 17 wherein the image is at least one of a digital photo and a digital video.

42390P11166

PATENT

23. (Previously amended) The computer program product of claim 17 wherein the sharing rule specifies at least one of a proximity to the location-identifying information, a set of location-identifying information and a bounding perimeter of location-identifying information.

24. (Original) The computer program product of claim 17 wherein the sharing rule comprises a rule that images are only to be shared with the one or more recipients that are on a buddy list.

25. (Previously amended) A computer program product including computer program code to cause a processor to perform a method of sharing an image having location-identifying information, the method comprising: determining a recipient of the image based upon the location-identifying information; and making the image available to the recipient.

26. (Original) The computer program product of claim 25, wherein making the image available comprises either automatically sending a copy of the image to the determined one or more recipients by e-mail or automatically sending a link to the image on a Web site to the determined one or more recipients.

27. (Original) The computer program product of claim 25, wherein the method further comprises converting the location-identifying information into location data using a location database.

28. (Previously amended) The computer program product of claim 25 wherein the location-identifying information comprises latitude and longitude coordinates.

29. (Previously amended) The computer program product of claim 25 wherein the image is at least one of a digital photo and a digital video.

42390P11166

PATENT

30. (Previously amended) The computer program product of claim 25 wherein the sharing rule specifies at least one of a proximity to the location-identifying information, a set of location-identifying information and a bounding perimeter of location-identifying information. See the attached Appendix for the changes made to effect the claims.

31 (Previously added) A method of sharing an image having location-identifying information, comprising:  
determining a recipient of the image based upon the location-identifying information; and  
making the image available to the recipient.

32. (Previously added) The method of claim 31, wherein making the image available comprises at least one of automatically sending a copy of the image to the recipient by e-mail and automatically sending a link to the image on a Web site to the recipient.

33. (Previously added) The method of claim 31, further comprising converting the location-identifying information into location data using a location database.

34. (Previously added) The method of claim 31, wherein the location-identifying information comprises latitude and longitude coordinates.

35. (Previously added) The method of claim 31, wherein the image is at least one of a digital photo and a digital video.

36. (Previously added) The method of claim 31, wherein determining a recipient of the image is performed using at least one of a proximity to the location-identifying information, a set of location-identifying information and a bounding perimeter of location-identifying information.

37. (Previously added) The method of claim 31, wherein making the image available to the recipient comprises making the image available to the recipient only if the recipient is on a buddy list.
